EDUCATION

New York University

BA, Gallatin School of Individualized Study
Concentration: Computer Science and Design

SKILLS

Design

Adobe Creative Suite, inVision and Sketch.

Programming

HTML5, CSS3 (SASS), JavaScript (jQuery, AngularJS, Node.js), Java, Python, Processing.

PERSONAL PROJECTS

Flatline

A visualization of your social media activity as an electrocardiograph. Written in Processing using the Temboo Library and another written in p5.js using node.js and socket.io. Demoed at the Razorfish Tech Summit, NYC Media Lab Summit and NYU Integrated Digital Media Student Showcase.

You snooze you lose

Set your alarm. If you do not wake up or press snooze too many times then it tweets, emails and/or sends text messages that detail the extent of your indolence to people you indicate. Won Best Student-made app at the Kandy Throw-down Hackathon.

Chintastic

Select your song, choose a background video, and watch your chin come to life in real-time! Using chroma key (green screen) for moving backgrounds and lip-sync to your choice of songs. 2nd place at the Spring 2015 HackNY Hackathon.

On my Radar

A visualization of your weekly schedule. Built with Express, Angular, Raphael.js and MongoDB.

EXPERIENCE

Control Group

Frontend Developer Intern
June 2015 - August 2015

- Designed wireframes and mockups for websites and mobile applications.
- Front-end development for content management system, mobile applications and websites, some of which are to be deployed on MTA Kiosks using JavaScript, AngularJS, HTML5 and CSS3.

Texts.com

Product Design Intern
February 2015 - May 2015

- Designed mockups and wireframes for many of Texts.com microsites and features using Illustrator and Photoshop.
- Designed marketing materials and social media assets for the marketing team to use in their social media campaigns.
- Implemented website and feature designs using HTML5, CSS3, JavaScript and Jekyll.

NYU Information Technology Services

Computer Lab Assistant
August 2014 - Present

- Performed basic computer troubleshooting.
- Provided assistance to NYU students in the form of technical help with computer related issues.

LEADERSHIP

Tech@NYU

Executive Board
August 2014 - Present

- Built tools for internal use by the executive board and external use by the NYC Student Technologists. (<http://techat-nyu.org/>)
- Organized weekly speaker events and/or workshops related to technology, design and entrepreneurship for about 25 - 40 students.
